DEAR SIR:

We beg to inform you that we have just received and unpacked in *perfect* condition the undermentioned Orchids and for which we respectfully solicit your valued order.

**CATTLEYA GIGAS.** (True Hardyana type.) These are in perfect condition, dormant and well leafed, they also come from a region where natural hybrids abound, and anyone buying a case or more of these is pretty well sure of getting something choice.

The general appearance of the plants is entirely different and distinct from the ordinary C. Gigas, the type is also a very floriferous one, as the old flower-stems will show, besides it is the earliest of all C. Gigas to bloom.

We offer them as follows:—

Plants with	5-6	bulbs	\$2.50	each,	\$24.00	per dozen,	\$175.00	per 100

Or in cases of 400 bulbs, selected plants, \$100.00 per case

Or in cases of about 30-40 plants, aggregating about 400 bulbs, for \$65.00.

**CATTLEYA TRIANAE.** (Popayan variety.) We have been fortunate in obtaining a shipment of this famous variety, the plants are not as heavy nor as good looking as the preceding, but this is impossible owing to the much greater distance. The type is known for its superbly shaped flowers and the great number of flowers to the stem. All orders received for this variety will have our best attention, and we can assure you that a number of years will again pass before you will have an opportunity to secure any of these plants.
